

Office Woolworths Headquarters

The situation

When one of Australia's leading retailers decided to undertake major refurbishment works in their Sydney Headquarters, it also made the decision to upgrade to littil LED lighting. Following suit, Woolworths Mulgrave in Melbourne also made the decision to upgrade with littil.

The challenge

The challenge for these projects included:

- 1 Designing customised lighting solutions that would satisfy the large number of varied employee requirements across both facilities.
- 2 Reducing the facilities' lighting running and maintenance costs whilst meeting the pre-determined lux level hurdles - the output and kelvin ratings were critical to the selection of the lighting system.

The solution

littil LED troffers were chosen in order to fulfill Woolworths' desire for an efficient and attractive lighting solution. In total, over 400 troffer units were installed into the two facilities.
